SUMMARY

Economics and Management student at The Open University, combining studies with work and hands-on data-analysis projects. Organized and detail-oriented, used to working by procedures and comfortable with numbers, Excel, and new systems. I learn quickly, take responsibility, and stay calm around people even at busy times. Looking for a student position in economics and finance where I can learn order intake, invoicing, and procurement processes, and help with day-to-day work with customers and suppliers. Available full-time.

SKILLS

Economics & Finance: micro and macroeconomics, statistics, reading and analyzing financial statements

Data & Analytics: advanced Excel (PivotTables, XLOOKUP, Power Query), Power BI (DAX), SQL queries and Python (Pandas) - cleaning and analyzing data and building clear reports and charts

Operations & Logistics: task coordination and scheduling, day-to-day work with suppliers and visitors, record keeping and following procedures

Programming & Tools: Java, Python, Git/GitHub, and daily work with AI tools (Copilot, Claude, Gemini, ChatGPT)

PROJECTS

Churn Prediction & Revenue Engine

github.com/danishaulov/churn-prediction-engine

End-to-end analysis of ~23 million real subscription transactions: a PostgreSQL and SQL pipeline computes the business economics (MRR, ARPU, LTV) and a Random-Forest model scores each customer for churn risk (ROC-AUC 0.907). Surfaced about NT\$13.8M/month of revenue at risk, with manual billing the top driver (37% vs 5% on auto-renew).

Tools: Python (Pandas, scikit-learn), PostgreSQL, SQL, FastAPI, Power BI

MyAnalyst - a data-analysis web app

myanalyst.net

An app I built and published: upload a data file and explore it right in the browser - data profiling, queries and charts, plus an AI layer that answers questions in plain language.

Tools: Next.js, TypeScript, Python, Groq LLM, Vercel

Customer Behaviour Analysis

github.com/danishaulov/CustomerBehaviour

Analysis of purchase data from 580 customers and 19 products in an online store: segmenting customers by buying and spending patterns, spotting missed opportunities (high-value abandoned carts), and practical recommendations to grow revenue.

Tools: Python (Pandas), SQL (SQLite), Matplotlib, Seaborn, Power BI

WORK EXPERIENCE

Team 3 - Security & Access Control (alongside studies)

2023 - Present

- Managing entry procedures for employees, suppliers, and visitors.
- Routine checks, monitoring, and control, with orderly record keeping according to procedures.
- Providing service and guidance to visitors and employees on site, including at busy times.

"Midor LeDor" Association - IDF Preparation Coordinator

2022 - 2023

- Coordinating IDF-preparation programs for teenagers: scheduling, working with different parties, and setting goals.
- Leading workshops and training sessions, and handling several tasks in parallel on a busy schedule.

IDF - Infantry Combat Soldier, Nahal Brigade

2020 - 2022

- Full combat service and ongoing operational activity, including operating technological systems in field conditions.
- Working within a squad and platoon - teamwork, responsibility, and discipline under pressure.

EDUCATION

The Open University - B.A. in Economics & Management

2025 - Present

AMIT Gutwirth High School - full matriculation, physics and computer-science tracks

2013 - 2019

LANGUAGES

Hebrew - native; English - high level (reading, writing, speaking); Russian - high level
